Whether you're an artist, a curator, a scholar, or a student, this workbook will help you:

- Understand the basics of blockchain technology
- Explore the different ways that blockchain can be used in the arts and humanities
- Develop your own blockchain projects

With clear and concise explanations, helpful examples, and hands-on exercises, this workbook is the perfect way to learn about blockchain technology and its potential for the arts and humanities.

What's inside?

This workbook is divided into three parts:

1. Part 1: Understanding Blockchain Technology

This part provides a comprehensive overview of blockchain technology, including its history, architecture, and key concepts.

2. Part 2: Blockchain in the Arts and Humanities

This part explores the different ways that blockchain can be used in the arts and humanities, including:

- Storing and managing digital assets
- Creating and managing decentralized applications
- Facilitating new forms of collaboration and funding

3. Part 3: Developing Blockchain Projects

This part provides hands-on exercises that will help you develop your own blockchain projects. You'll learn how to:

- Create a blockchain using Ethereum
- Develop a smart contract
- Deploy a blockchain application

Who is this workbook for?

This workbook is for anyone who is interested in learning about blockchain technology and its potential for the arts and humanities. Whether you're an artist, a curator, a scholar, a student, or simply someone who is curious about the future of technology, this workbook will provide you with the knowledge and skills you need to get started.
